The Chairman BWSSB Kavari Bhavan Bangalore 560001

Dear Sir,

We would like to bring to your notice, the perennial problem that we are facing, because of the sewage flowing in to the lake from over flowing sewage line from the man hole near the lake on Doddaballapur road near the BMTC depo. We were in touch with the officials and the problem got solved temporally. The problem has recurred again after few days. We also came to know from the officials that the pipe line is small and needs to be changed. We would like to bring to your notice the following facts.

- The defunct STP which is near the lake supposed to receive all the sewage around that area. Since it is not functional, they are pumping to the Yelahanka STP plant. Part of the sewage line which was connected to this STP from 5th phase Yelahanka through the main road, was replaced by rerouted along the storm water drain and inside the lake boundary. Many manholes were constructed inside the lake. The sewage which is overflowing from these manholes destroy the lake. The STP workers remove the manhole cover whenever there is a problem in pumping sewage to Yelahanka treatment plant and leave the sewage into the lake. This is happening often, and we request your office to take a permanent solution by removing the pipeline from the lake. Photos are attached for your reference which is taken on 12.06.2019.
- The Sewage line on the Doddaballapur road which carries sewage from layouts on this road reaches this STP through a pipe line on the road, adjoining the lake. But because of the gradient of the pipe line, they have left the sewage in to the rajakaluve which connects the Puttenahalli and Yelahanaka lake. This leads to polluting Yelahanka Lake. We request you to take action to rectify the same.

We request BWSSB to take action immediately.

Warm regards

(K.S.Sangunni)
